# JUMO mTRON T

## Measuring, Control, and Automation System

### Multifunction panel 840

#### Brief description

The multifunction panel 840 with TFT-touchscreen allows easy and clearly-arranged measured data visualization, operation, configuration, and parameterization of the system.

The TFT color screen has a screen size of 21.3 cm (8.4“), a resolution of 640 x 480 pixels, 256 colors, and LED backlight.

As the interface between man and machine, the panel allows an optimum and clearly-arranged view of the process status and the system parameters. In addition, it is perfectly suitable for the display and operation of controller screens, process screens, the program editor, and the optional recording function. Setpoint values, batch text, parameters, and configuration data can be directly entered and changed by the user on the screen.

The process data that is transmitted by the system bus is shown in real time. Data archiving and evaluation is made possible by established PC-programs.

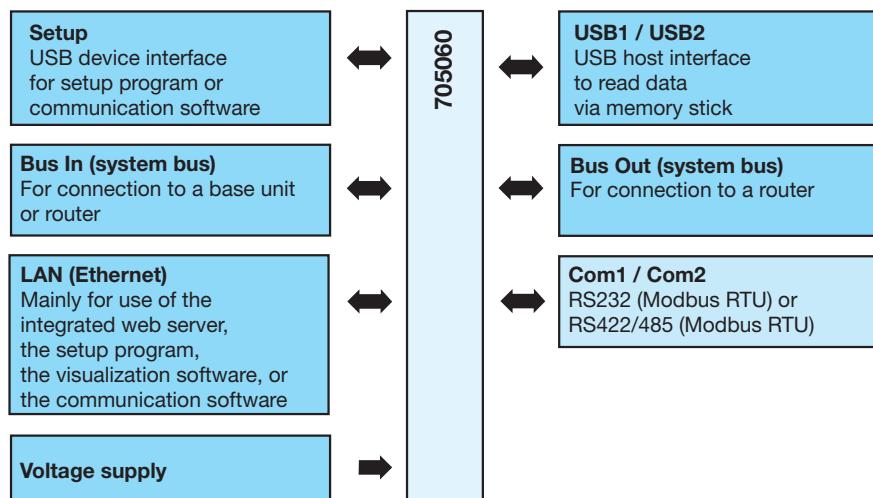

In addition to the standard interfaces (LAN, USB), two optional serial interfaces can be connected to a barcode scanner, modem, or other Modbus devices (master, slave).

The user can comfortably configure the multifunctional panel 840 with the setup program. And many functions are also configurable directly on the multifunction panel 840.

Type 705060/...

#### Block diagram

#### Features

- TFT-touchscreen 21.3 cm (8.4“) with 640 x 480 pixel resolution and 256 colors
- Predefined screen masks for controllers, program generators, and recording functions
- Customized process screens
- User administration
- Configuration of the entire system possible
- Recording function (option)
- Integrated web server
- Ethernet interface
- Three USB interfaces
- Two RJ45 system bus connections (1 x bus In, 1 x bus Out)
- Two serial interfaces (option) as RS232 or RS422/485 for bar code scanner as well as Modbus RTU master/slave
- Sturdy metal case, IP67 protection at the front

## Description

The multifunction panel 840 can be used by the user to configure, parameterize, monitor, and operate the measuring, control and automation system. A recording function, as known from the JUMO paperless recorders, is available as an option. The JUMO mTRON T system bus supports one multifunction panel; the prerequisite for using the multifunction panel is an installed central processing unit.

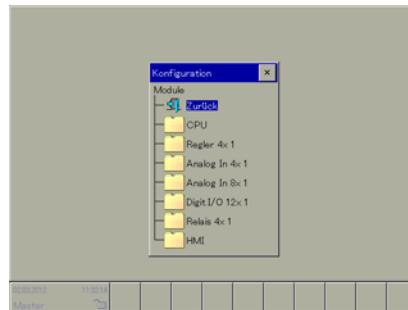

### Standard functions

#### Start screen (e. g. process screen)

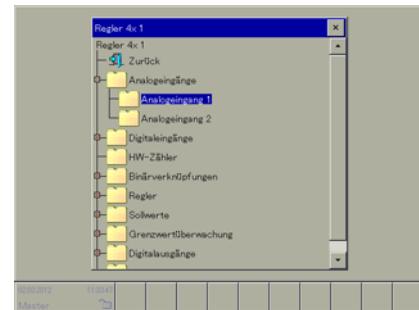

- Selectable start screen
- Operation via symbol bar
- Screen switch-off
- User-specific visualizations
- User level

#### Configuration of the modules

- Online configuration of all input/output modules

#### Example: Controller module

- Inputs/outputs
- Controller type
- Self-optimization
- Special functions for the plastics processing industry
- Setpoint values
- Limit value monitoring

#### Visualization of the controller channels

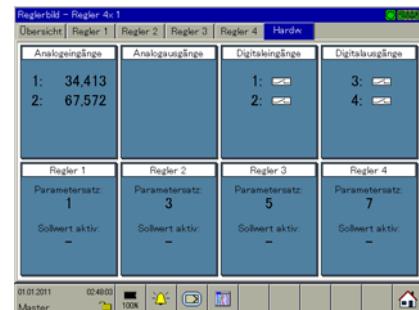

- Up to four controller channels per controller module
- Overview of the active control variables
- Online editing of the setpoint values
- Online editing of the setpoint values

#### Single controller channel

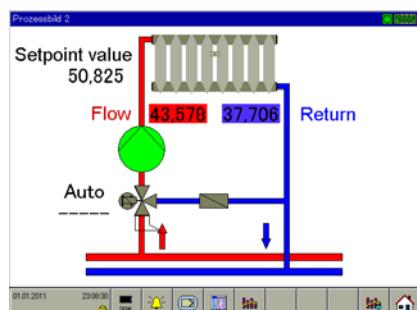

- Overview of the active control variables
- Online editing of the setpoint values
- Manual start of the self-optimization and the manual mode

#### Controller module

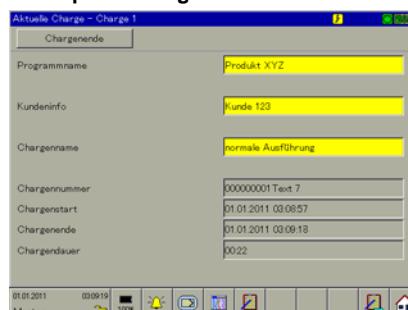

- Overview of the active inputs and outputs
- Overview of the active control variables

#### Process mask

- 18 customer-specific process screens
- Freely configurable display (via setup program) of process values

#### Batch protocling

- Simultaneous recording of nine batches
- Toggling between current and completed batch protocols
- Batch texts are readable via interface and barcode scanner (among other methods)

#### Completed batch protocols

- Graphical data evaluation
- Numerical data evaluation

### User level

- Important parameters user-specifically summarized in one window
- Less time required for configuration and parameterization

### Alarm and event lists

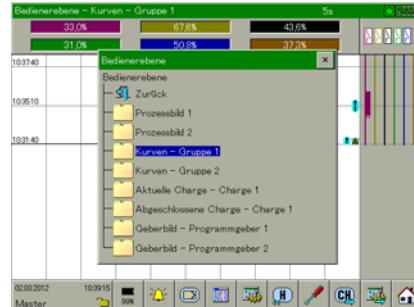

- Alarms of the multifunction panel
- Events of the multifunction panel
- Events of the central processing unit

### Information about the modules

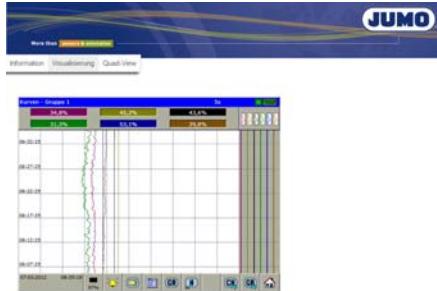

- Overview of the connected modules
- Easy module selection by touching the touchscreen

### Operator level

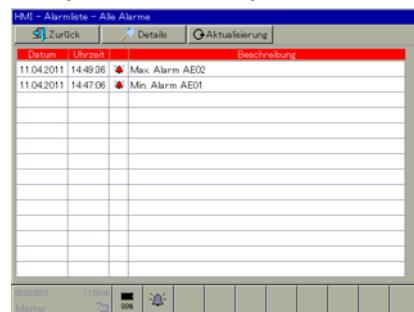

- Important visualizations user-specifically summarized in one operator level

### Web server

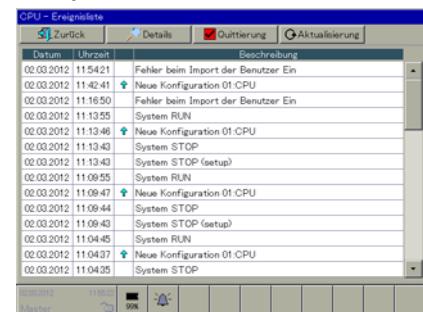

- Integrated web server
- Simultaneous access by several PCs possible
- User-specific pages

### Example: Multifunction panel 840

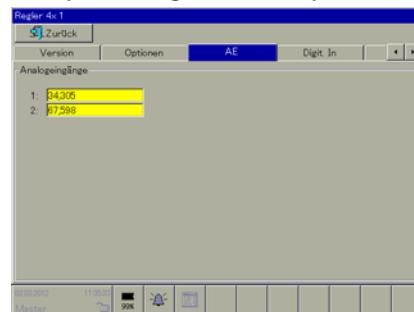

- Alarm when specific limits are exceeded
- All texts can be adjusted
- Alarms and events batch-related or overall overview

### Example: Base unit

- Events of the base unit (central processing unit)
- All texts can be adjusted

### Example: Analog controller inputs

- Overview of a controller module
- All signals, distributed to various tabs

### Example: Multifunction panel 840

- Overview of the multifunction panel
- All signals, distributed to various tabs

## Recording function (option)

Due to the recording function (extra code), the multifunction panel 840 becomes a real paperless recorder, which not only records analog and digital channels but also all controller variables and controller signals. Channels of Modbus slave devices can be integrated into the system and recorded via a Modbus interface and the corresponding Modbus master function.

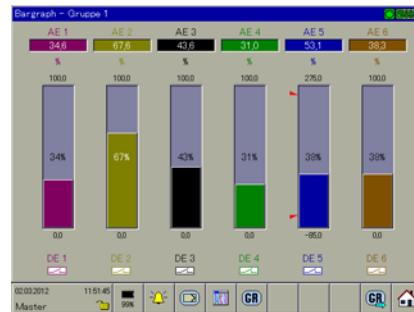

As of system version 03, analog and digital channels can also be displayed horizontally. The header rows of the vertical presentation (channel name, analog value, switch symbol) are then shown on the right of the analog and digital traces.

### Visualization

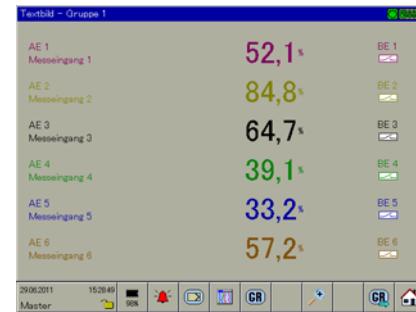

- Visualization of the data in various diagrams (curves, bargraph, text screen, digital, report, counters/integrators)
- Recording of 54 analog channels, 54 digital channels, 27 counters/integrators
- Summary of the channels in nine groups

### Bargraph screen

- Display of the analog channels with scaling and limit values in bargraph form
- Bargraphs change color when limit values are exceeded/undercut

### Text screen

- Numerical display of the measured values
- Values change color when limit values are exceeded/undercut
- Enlarged display of one channel along with a bargraph display is possible

### Digital image

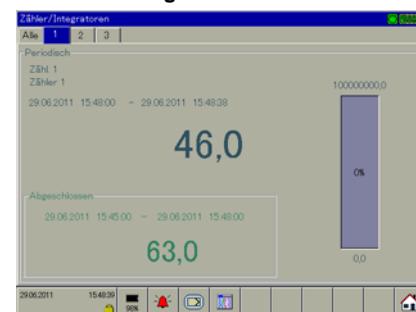

- ON/OFF display of the digital channels
- As of system version 03 horizontal presentation also possible

### Report

- Display of various reports dealing with the analog channels of one group
- Display of minimum, maximum, average/integral value, and time period

### Counters / integrators

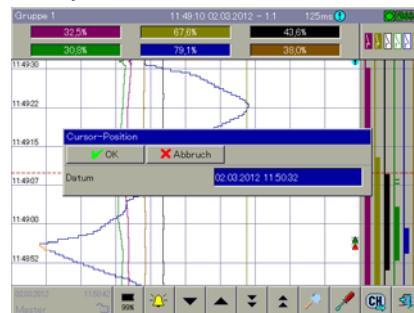

- Display of up to 27 counters or integrators
- Toggling between individual and overall display
- Display of the current counter reading and the last completed counter reading

### Comment

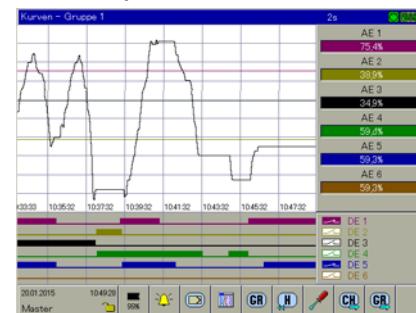

- Input of user-specific comments with on-screen keyboard
- Overview in the event lists of the multifunction panel

### History

- Curve representation of all measured data saved in the multifunction panel in different zoom stages
- Display of scaling and limit value marks of a channel
- Numerical display of the analog measured values at the cursor position
- Search function

### Horizontal presentation

- Horizontal presentation of analog and digital channels with and without header rows
- Individual configuration for each group
- Available as of system version 03

## Program generator (option)

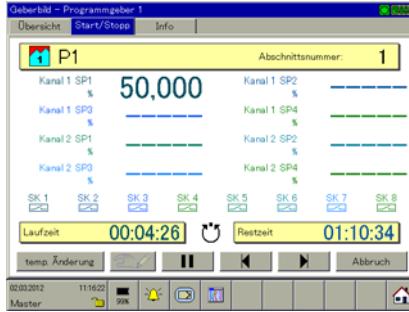

The optional nine program generators (extra code of the central processing unit) can be configured and operated by the user via the multifunction panel 840.

### Overview of all program generators

- Display of the allocated and free program generators

### Operation of the program generators

- Program selection
- Starting/stopping programs
- Activating manual mode

### Creating your own programs

- Creating and changing programs with the integrated program editor

## Technical data

### Interfaces

USB device interface	
Connector designation	Setup
Connector type	Mini-B
Number	1
Application	To operate the setup program
Max. current	100 mA
USB host interface	
Connector designation	USB1 and USB2
Connector type	A
Number	2
Application	For reading out data via memory stick
Max. current	100 mA
System bus In	
Connector designation	Bus In
Connector type	RJ45
Number	1
Application	For connection of a base unit or router module
Connection cable	Network cable (patch cable or crossover cable), at least CAT5 (S/FTP)
Cable length	Up to 100 m
System bus Out	
Connector designation	Bus Out
Connector type	RJ45
Number	1
Application	For connection of a router module
Connection cable	Network cable (patch cable or crossover cable), at least CAT5 (S/FTP)
Cable length	Up to 100 m
Ethernet	
Connector designation	LAN
Connector type	RJ45
Number	1
Application	Communication with PC (setup program, data archiving, web server), e-mail server, and Modbus master/slave
Protocols	TCP/IP, HTTP, DHCP, SMTP+POP3, Modbus/TCP
Baud rate	10 Mbit/s, 100 Mbit/s
RS232 or RS422/485 (serial interface)	
Connector designation	Depending on the ordered device version
Connector type	COM1 and COM2
Number	D-Sub
Application	2
Protocol	Communication with Modbus master/slave, connection of a barcode scanner or modem including alarm transmission/message via text message or e-mail
Baud rate	Modbus RTU as master/slave, bar code scanner
External inputs (external variables)	9600, 19200, 38400
	Via Modbus master/slave functions, 54 analog and 54 digital inputs

## Screen

Type	Touchscreen TFT color monitor
Size	21.3 cm (8.4")
Resolution	640 x 480 pixels
Number of colors	256 colors
Frame rate	> 150 Hz
Brightness setting	Adjustable on the device
Screen saver (shutdown)	Via waiting time or control signal

## Electrical data

Voltage supply Connection Voltage Residual ripple	At the case bottom (removable terminal strip, 2-pin with Push-In technology) DC 24 V +25/-20 % SELV 5 %
Current consumption	Max. 750 mA (at DC 19.2 V)
Power consumption	Max. 15 W
Conductor cross section (voltage supply) Wire or strand without ferrule Strand with ferrule 2 x strand with twin ferrule with plastic collar	Min. 0.5 mm <sup>2</sup> , max. 2.5 mm <sup>2</sup> Min. 0.5 mm <sup>2</sup> , max. 2.5 mm <sup>2</sup> Min. 0.5 mm <sup>2</sup> , max. 1.5 mm <sup>2</sup> (both strands with the same cross section)
Stripping length	10 mm
Electrical safety	Acc. to DIN EN 61010-1 Overvoltage category III, pollution degree 2
Electromagnetic compatibility Interference emission Interference immunity	Acc. to DIN EN 61326-1 Class A – only for industrial use – Industrial requirements

## Case and ambient conditions

Case type	Metal case for mounting into a panel cut-out (indoor use); front with decor foil
Dimensions (W x H x D)	235 mm x 195 mm x 58 mm (without connection elements)
Weight (fully equipped)	Approx. 1.8 kg
Protection type	Front IP67, rear IP20, acc. to DIN EN 60529
Ambient temperature range	-20 to +55 °C
Storage temperature range	-30 to +70 °C
Resistance to climatic conditions	Relative humidity ≤ 90 % annual average without condensation (climatic class 3K3 acc. to DIN EN 60721-3-3 with extended temperature and humidity range)
Site altitude	Up to 2000 m above sea level
Mechanical ambient conditions <sup>a</sup>	Vibration test acc. to DIN EN 50178 Shock test acc. to DIN EN 60068-2-27 Drop test acc. to DIN EN 60068-2-32

<sup>a</sup> Test conditions are listed in the System Descripion B 705000.8.

## Connection diagram

The connection diagram included in the data sheet provides initial information about the connection options. Only use the installation instructions or the operating manual for the electrical connection. The know-how and the correct technical implementation of the safety warnings/instructions contained in these documents are the prerequisite for the installation, electrical connection, and initial start as well as for the safety during operation.

### Interfaces
